

Metrics of Success

1. People spend less time hunting for a tab that they want to switch between. [quantitative]
2. Users can better manage the sites that they want to read later but don't want to bookmark. [qualitative]
3. People can still move quickly between a small set of tabs (i.e., the random access that the traditional tabs interface gives). [both]
4. People keep more tabs open at once while not increasing tab-switch times. [quantitative]
5. People garbage collect more aggressively. [quantitative]
6. Continues to work well for small sets of tabs. [qualitative]
