

Open questions: * How do I get the help back? * Do we need explicit help for getting out of TabCandy? (probably answered by user testing)

Last week of May Release Revision-B version of TabCandy. This Release Revision-A version of TabCandy. This release is fully dog-foodable, but is not feature release is feature complete, meaning that

features are frozen after this time. This release should take into account the feedback we've received. We'll have blogged extensible about the process of moving from Revision-A to Revision-B.

Metrics of Success (from Beltzner) * Time to find a particular tab * Average time spent hunting * Raw switch time (back and forth)

Common task flows that we think people are

required for these things

Finish the specification for minimum thing for shipping.!

Last week of June

Release Revision-C version of TabCandy. This release is feature complete, and interaction complete. We are now happy with all of the features and how they work. By this point, we hope to have tens of

thousand (if not more) users. I'd like to figure out how to integrate this with the beta versions

Last week of July Release Revision-D. This release focuses on polish—both performance and fiddly edgecases. By this release, we hope to have something we are feeling confident about trying to get onto trunk.

of Firefox.

* Psychometric time? * User acceptance button

doing with tab Open new/switch back and forth/actions

Because we are using an overlay, we are no longer constrained by keeping the size of the group from overlapping with others pages

> visually-useful minimum size. You can still drag pages around to re-order them inside the overlay.

You can drag a page out of an overlay to put it into another group. When it crosses the boundary of the overlay, the overlay shrinks away and you can place the page anywhere you like.

There should be a global new-page button. It appears in the "New Tab" group (i.e., where a new tab would appear if opened as an orphan).

The winner!

* Where do closed groups go in general? (A history might be useful)
